Active Security Clearance

EDUCATION

Bachelor's of Science in Computer Science

May 2026

Wright State University

GPA: 3.857

- Minor in Mathematics

Master's of Science in Computer Engineering

May 2027

Wright State University

GPA: 4.00

WORK EXPERIENCE

General Intern

Sep 2021 — Aug 2023

TJAR Innovations LLC

Xenia, OH

- Learned to use SOLIDWORKS from scratch
- Utilized SOLIDWORKS to design models for industrial 3D-printed molds
- Created simple SOLIDWORKS assemblies to help visualize components for employer

Software Intern

Jun 2024 — Aug 2024

SciTec Inc

Fairborn, OH

- Supported software development on SBIR contract for the US Air Force on a four-person team at 350-employee defense contracting company for two separate summers
- Set up a custom docker container using Redhat Linux
- Co-developed a recorder and playback tool for ZMQ data streams
- Wrote unit tests for ZMQ program in Java to ensure 80% code coverage

Software Intern

Jun 2025 — Aug 2025

SciTec Inc

Fairborn, OH

- Participated in a ten-person team and learned common team management practices
- Assisted in development of visualization software for geostationary and geosynchronous satellites

PROJECTS

Word Memory Video Game

Mar 2023 — Apr 2023

- Came up with the idea for an original video game involving word memory
- Programmed the entire video game in Java with the Swing toolkit
- Used GUIs to create a functional interface for the video game
- Provided instructions to the player via GUIs for how to play the video game

Magic Schedule Generator

Aug 2025 — Dec 2025

- Worked on a team with two other graduate students for an Intro to Software Engineering course
- Developed a program that could generate class schedules for a student given specified majors and desired schedule length
- Program had a fully developed web interface that used Flask as the framework for the back-end
- Assisted with the development of both the Python-based back-end and HTML/CSS-based front-end
- Learned to communicate and divide responsibilities with team members and document progress with weekly reports

Death Star Plans Transmitter

Sep 2025 — Apr 2026

- Worked on a five-person team of college students for a Senior Project course
- Engineered a system that could detect, send, and receive a series of JPEGs without WiFi, Bluetooth, or a wired connection
- System used machine learning to detect 10 correct images out of a batch of 100 total images
- System also sent and received the correct images by streaming a series of QR codes encoded with the image data
- Images were displayed after being received by a camera on a custom website developed with Google Firebase
- Assisted with the integration of the QR streaming software and setup of the website back-end
- Documented the system's functionality as well as its requirements and constraints on Google Docs and PowerPoint

SKILLS

- **Programming Languages:** Java, Python, C/C++, Bash, HTML
- **Technologies:** VSCode, Eclipse, git, UNIX, Docker, Vim, Java Swing, SOLIDWORKS, Microsoft PowerPoint

ACHIEVEMENTS

- | | |
|---|-----------------------|
| • Wright State Honors Program Competitive Scholarship | Aug 2022 — Apr 2025 |
| • College of Science and Mathematics Dean's List | Fall 2024 |
| • College of Engineering and Computer Science Dean's List | Spring 2025 — Present |
